About G&G

## LINEAR LIGHT THAT LASTS.

G&G Industrial Lighting was founded in 2010 to fill industrial lighting needs for high quality linear LED products, especially those suitable for wet environments. Since its inception, the company has developed a widespread reputation for innovation and outstanding customer service. We understand that quality products and quality support make all the difference. That's why we're proud to say all of our luminaires are made right here in America. And real-live support is just a phone call away at our Clifton Park, New York headquarters.

G&G began in the car wash industry and it's here we focused our development efforts to engineer several innovative LED products to stand up to these requirements and thrive in this harsh environment. Features such as a chemical resistant seamless housing, low-profile design, waterproof cabling system and the highest IP ratings available all help to make G&G leaders in the industry. We know that high pressure spray, rigorous cleaning chemicals and constant high humidity levels are all factors that challenge car wash lighting, and that's why we made our luminaires versatile, strong, and simple. Let G&G help your car wash shine.

# UNLOCK THE POWER OF COLOR.
